

**Nobleton Sewer Project Open House
Wednesday September 27
4:00p.m. to 9:00 p.m.
Nobleton Arena Upstairs Meeting Room**

There are some items which residents may wish to clarify for a full understanding of the costs to you and the planned schedule for implementation.

1/ Hook up is mandatory, regardless of whether your current septic system works.

2/ The cost will be somewhere in the \$ 12,000 per household range; plus thousands of dollars to connect from the street to your house, according to the most recent C.N.Watson report.

3/ If you do not find adequate alternative financing opportunities, the debt will be registered on title as a lien against your property.

I encourage you as a resident of Nobleton, attend and get the facts on this major project. Many will need to plan for the upcoming costs and changes.
